

7/13/08

**The Broome County Fire Police are instituting a new policy and would like all fire departments in the county to participate in this. We have all seen or heard of instances where vehicles have run through police barricades and come directly into an emergency scene, endangering the lives of emergency personnel and others who are in the roadway. This "runner, runner, runner" radio call is to alert personnel that a vehicle has breached the police lines and is heading for the emergency scene. If your fire department would like more information or would like to have someone come in and do a training for your department and fire police, please contact President Dave Reese of the Broome County Fire Police Association at [dreese@stny.rr.com](mailto:dreese@stny.rr.com)**
