## **Structural Stability of Engineered Lumber in Fire Conditions Online Course**

An on-line firefighter training course is the result of a research partnership of UL, Chicago Fire Department, IAFC, and Michigan State University, funded in part by the U.S. Department of Homeland Security (DHS). This self-guided course focuses on the structural stability of engineered lumber under fire conditions is targeted toward the 1.1 Million Fire Service personnel in the United States and Canada. The knowledge developed and shared in this course is critically important to firefighter and civilian safety. To investigate and sign up go to: <http://www.ul.com/fire/structural.html>.
