Instructor: Craig Konkle of CK Consulting

Description: 4-hour training to understand how to safely respond to a gas well location incident.

This session is designed to help you understand the hazards associated with response to a location including:

- A series of presentations on well site operations and terminology
- Videos to help explain the material
- Review exercises to reinforce the material

Cost: No cost for this class. The class is being paid for by funds from a New York State Grant acquired by Senator Tom Libous.
