

Size Up and Radio Ops Training

Tuesday June 17th at 7PM

Description: Being able to properly size up a building and give a good arrival report is a skill every firefighter should have. Through scenarios and real radio practice, students will learn how to identify hazards, describe conditions and give a quality arrival report which informs all other incoming units of the situation and sets the tone for the rest of the fire.

Please let us know as soon as possible the number of Firefighters from your Fire Department that will be attending this class.

Call 765-6579 with the count and FD name.

Location

Huron Auditorium room
1701 North St., Endicott

Parking in the rear
