

Seminar for First Responders on Compressed Natural Gas

With the rising demand for compressed natural gas, have you wondered how this gets to locations that do not have a pipe line or access to a port where it is brought in on a barge?

The answer is a Virtual Pipeline transported by truck.

Join representatives of NG Advantage and Terpening Trucking for a seminar to learn:

- The hazards and safety devices incorporated in these vehicles.
- How to identify these vehicles and safely approach during an incident.
- Benefits of a virtual pipeline.
- The loading and unloading process at the terminal.

There will be a CNG Truck & Trailer on hand so everyone can see the vehicles first hand.

Where: **Chenango Fire Company**
86 Castle Creek Road
Binghamton, New York

When: March 9th 9:00 am
